

December 16, 2025: Letter to Space Force

Good morning, I am writing to remind your agency that your tools of spying are continuing to be used illegally by a team of criminals that are driving vehicles past our home as a method of intimidating me and causing a private nuisance to disturb the peace of my life. I have explained before that I was elected as a Republican representative of my neighborhood and this was the result of involving myself in politics: a group of government-sponsored criminals began spying on everything I did and began inserting themselves into my life (as if they were raping my consciousness) at all hours of the day and night. I am asserting that your military operations are conducting psychological warfare against its own citizens.

Sincerely, Chris Carlin
